

TECHNICAL FEATURES

DESINA® (which stands for **DE**centralised and **Standardised IN**stallation technology) is an innovative installation concept behind a study headed by the German manufacturers of machine tools association (VDW), with the co-operation of users (including German automotive manufacturers) and component manufacturers, which has led to the introduction of a specification aimed to standardise electrical, hydraulic and pneumatic components and their interconnection on common platform for CNC controlled machine tools and manufacturing lines.

In the last few years, the DESINA® specification has been successfully endorsed by the ISO TC 184/SC 1 "Industrial automation systems and integration / Physical device control" as an ISO standard.

This work has been completed, and the following standards have become available:

ISO 23570-1 Industrial automation systems and integration – Distributed installation in industrial applications:
Part 1 – Sensors and actuators.

ISO 23570-2 Industrial automation systems and integration – Distributed installation in industrial applications:
Part 2 – Hybrid communication bus.

ISO 23570-3 Industrial automation systems and integration – Distributed installation in industrial applications:
Part 3 – Power distribution bus.

Normally, production systems are controlled by various field buses available on the market such as PROFIBUS, CAN, INTERBUS, etc. DESINA® decentralised approach and interface and connector standardisation, which allows a single distributed control system to be independent from the bus communication protocol selected by the final user, ensure lower installation costs.

The availability of diagnostic capabilities in all the system components ensures a speedier diagnosis in the event of faults and an easier and quicker reset operation, which may be carried out by less specialised staff. DESINA® connection topology requires a **control bus** and a **power bus**.

The hybrid (optical/electrical) control bus provides a serial connection for the devices by using a cable consisting of two fibre optics and four power lines. The devices are fitted with 2 hybrid connectors (and matching flush mounted enclosures) for bus entry and exit.

The hybrid connectors include an interface circuit which turns the TX electrical signal to optical signal with TTL levels and the RX signal from optical to electrical signal with TTL levels.

In other words, **the interface is independent from the selected field bus protocol**, and simply converts the electrical signals into optical signals and vice versa; by doing so, the physical connection between the devices can be used for different bus protocols and can reach a 50 m range by using POF plastic fibres or 300 m by using HCS® fibreglass (Hard Clad Silica – Spectran Corporation registered trademark). The highest baud rate is 12 Mbit/s, compatible with the most advanced field buses.

**ISO 23570-3 standard and
DESINA® specification compliant**

Another variant is also available, which is based on transmitting data on a pair of screened copper cables (instead of fibre optics); in this case, however, the system can only be used for PROFIBUS or CAN buses with RS 485 TX signals.

In both cases, the connector is fitted with housings for 5, 10A auxiliary contacts (**CD** series crimp contacts), which allow all connected devices to receive a permanent direct voltage of 24V (to supply circuits) and a 24V non permanent power supply (only used to open the contactors after operating an emergency switch or a safety switch), as well as a contact available for an optional earth.

The power bus provides a serial connection for drives, controls and power supplies and, more specifically, is suitable to supply power to motors and to their control units.

The standard connector to control motors is the **CQM/F 08** which, with 8 poles + ⊕ 16A 500V, and **CC** series crimp contacts, not only provides a power connection, but also connects the motor brake and safety thermistor.

Another variant is available in the same sizes as the enclosure: **CQM/F 04/2** featuring 4 poles + ⊕ 40A 400/690V and 2, 10A 250V auxiliaries.

For the motor side connection, the connector **CNEM/F 10** (10P + ⊕ 16A 500V 6kV 3, with screw terminals) should be used; with the option to make a star or a delta connection on the connector, the **CSSM/F 10** connector (10P + ⊕ 16A 500V 6kV 3, with spring terminals, two per pole) should be used.

ILME connectors are manufactured to DESINA® specifications and in compliance with ISO 23570-2 and 23570-3 standards.

Hybrid socket and plug connectors for field buses compliant with DESINA® specifications and with ISO 23570-2 standard

The hybrid connectors for field buses are listed below:

- optical field bus **plug**

- optical field bus **socket**

electrical auxiliary female contacts

CXL 2/4 PF (for plastic fibre optics POF)

CXL 2/4 PFH (for glass fibre optics HCS®)

CXL 2/4 SF

electrical auxiliary male contacts

CXL 2/4 PM (for plastic fibre optics POF)

CXL 2/4 PMH (for glass fibre optics HCS®)

CXL 2/4 SM

The hybrid inserts for **socket** type optical field buses can only be fitted inside **fixed enclosures**.

The **plug** types, on the other hand, can only be fitted inside **free enclosures (hoods)**.

The enclosures and matching accessories available are listed below:

Construction details

- fixed, flush mounted enclosure:

- free enclosures (hoods), top entry:

- free enclosures (hoods), side entry:

- cover:

Material: **PLASTIC**

The portable enclosures and the covers are fitted with an additional seal in order to achieve the versatile **IP65/IP67** degree of protection according to IEC/EN 60529. With these accessories the enclosures also achieve the **IP69** degree of protection (tightness to high pressure and temperature water jets) according to the same standard. The full versatile degree of protection becomes therefore **IP65/IP67/IP69**. The **IPX9** test is identical with that of former German standard DIN 40050-9 (IP69K) currently specified by **ISO 20653** for use on board road vehicles.

Specifications

Interface

Hybrid electrical-optical connector insert consisting of 2 connectors for fibre optics and 4 contacts for electrical wires; an interface circuit built into the optical socket converts the electrical signals into optical signals and vice versa.

Optical parts

transmitter (T): Agilent (HP) Versatile Link HFBR-1525, or equivalent

receiver (R): Agilent (HP) Versatile Link HFBR-2525, or equivalent

male optical contact: Agilent (HP) Versatile Link

HFBR-4531, or equivalent, Simplex snap-in type (without crimping) for POF plastic fibre optics;

HFBR-4521, or equivalent, crimp contact, for HCS® glass fibre optics

note: POF is a plastic fibre optic with a 1000 µm diameter for red light and wavelength = 660 nm.

HCS® is a Hard Clad Silica glass fibre optic with a 200 µm diameter for red light with wavelength = 660 nm.

Optical parts:

laser class I

Electrical contacts

4 maximum current 10A, gold or silver plated brass crimp contacts, cable section 0,14...2,5 mm² (CD series); live wire end female. Nominal voltage 24V.

Electrical data in compliance with EN 61984: 10A 25V 0,8kV 3

Degrees of protection: IP65/IP67/IP69 according to EN 60529 (if a cable clamp with IP67/IP69 rating is used).

Temperature range: -40 °C / +70 °C

Data transmission/reception rate (Data rate): up to 12 Mbit/s

Designation of auxiliary electrical contacts

Designation of auxiliary electrical contacts (male and female) in the hybrid socket connector with optical TX system:

Socket connector with male auxiliary electrical contacts CXL 2/4 SM

Pos.	Function
1:	+ 24V not switched
2:	0V (reference for contact 1)
3:	0V (reference for contact 4)
4:	+ 24V switched

optical →

electrical →

Socket connector with female auxiliary electrical contacts CXL 2/4 SF

Pos.	Function
1:	+ 24V not switched
2:	0V (reference for contact 1)
3:	0V (reference for contact 4)
4:	+ 24V switched

optical →

electrical →

Insulation displacement connector (IDC) for ribbon flat cable on printed circuit

Pos.	Function	Pos.	Function
1:	earth	6:	TXD
2:	RXD	7:	earth
3:	RXD	8:	+5V DC
4:	earth	9:	+5V DC
5:	TXD	10:	earth

The contacts in the hybrid socket connector are numbered in a clockwise direction.

With reference to this, the contacts in the field bus hybrid plug connector are numbered anticlockwise.

"R" Data reception (beam exit) - "T" Data transmission (beam entry).

Socket and plug connectors for power buses compliant with DESINA® specifications and with ISO 23570-3 standard

The connector inserts on the power bus for a motor controller are as follows:

- **CQM 08** plug
- **CQF 08** socket

The connector inserts for the motor controller may be fitted inside the following enclosures:

Construction details
Material: **PLASTIC**

- bulkhead mounting, straight, fixed enclosure: **CQ 08 I**
- bulkhead mounting, angled, fixed enclosure: **CQ 08 IA**
- bulkhead mounting, angled, fixed enclosure, rear entry: **CQ 08 IAP**
- free enclosure (hood), top entry: **CQ 08 V**
- free enclosure (hood), side entry: **CQ 08 VA**
- free enclosure (hood), top entry and lever: **CQ 08 VG**
- free enclosure (hood), side and top entry: **MQ 08 VO225**
- socket cover: **CQ 08 C**
- plug cover: **CQ 08 CA**

The **CQ/MQ 08** enclosures and covers once complete and fitted with suitably rated cable gland or conduit fitting ensure the versatile **IP65/IP67** degree of protection according to IEC/EN 60529. With these accessories the enclosures also achieve the **IP69** degree of protection (tightness to high pressure and temperature water jets) according to the same standard. The full versatile degree of protection becomes therefore **IP65/IP67/IP69**. The **IPX9** test is identical with that of former German standard DIN 40050-9 currently specified by **ISO 20653** for use on board road vehicles.

Specifications

- Connection:** **9 contacts (8 + ⊕)**
The male connectors (plugs) are used for termination of connecting cables; the female connectors (sockets) are fitted on the motor controller
- Electrical contacts:** 9 maximum current 10A, gold or silver plated crimp contacts, cable section 0,5...2,5 mm² (20 AWG -14 AWG) CC series
- Degrees of protection:** IP65/IP67/IP69 according to EN 60529 (if a cable clamp with IP67/IP69 rating is used)
- Temperature range:** -40 °C / +125 °C
- Electrical data:** compliant with EN 61984: **16A 500V 6kV 3**
- Self extinguishing properties:** 94V-0 compliant with UL 94 standard; glow-wire 960 °C compliant with IEC/EN 60695-2-11 standard

Designation of contacts

The designation of contacts for motor controller outlet is as follows:

contact	designation
1	line L1
2	
3	line L3
4	brake (0 V)
5	temperature sensor
6	brake (+24V c.c.)
7	line L2
8	temperature sensor
PE	protective earth

The connector inserts on the power bus for a motor controller are as follows:

- **CQM 04/2** plug
- **CQF 04/2** socket

These connector inserts can be fitted inside the following enclosures:

Construction details
Material: **PLASTIC**

- bulkhead mounting, straight, fixed enclosure: **CQ 08 I**
- bulkhead mounting, angled, fixed enclosure: **CQ 08 IA**
- bulkhead mounting, angled, fixed enclosure, rear entry: **CQ 08 IAP**
- free enclosure (hood), top entry: **CQ 08 V**
- free enclosure (hood), side entry: **CQ 08 VA**
- free enclosure (hood), top entry and lever: **CQ 08 VG**
- free enclosure (hood), side and top entry: **MQ 08 VO225**
- socket cover: **CQ 08 C**
- plug cover: **CQ 08 CA**

The **CQ/MQ 08** enclosures and covers once complete and fitted with suitably rated cable gland or conduit fitting ensure the versatile **IP65/IP67** degree of protection according to IEC/EN 60529. With these accessories the enclosures also achieve the **IP69** degree of protection (tightness to high pressure and temperature water jets) according to the same standard. The full versatile degree of protection becomes therefore **IP65/IP67/IP69**. The **IPX9** test is identical with that of former German standard DIN 40050-9 (IP69K) currently specified by **ISO 20653** for use on board road vehicles.

Specifications

- Connection:** **5 (4 + ⊕) power contacts + 2 auxiliary contacts**
The male connectors (plugs) are used for termination of connecting cables; the female connectors (sockets) are fitted on the motor controller
- Electrical contacts:** 5 maximum current 40A (3P+N+⊕) gold or silver plated crimp contacts, cable section 1,5...6 mm² (16 AWG -10 AWG) CX series; 2 maximum current 10A, gold or silver plated crimp contacts, cable section 0,14...2,5 mm² (26 AWG -14 AWG) CD series
- Degrees of protection:** IP65/IP67/IP69 according to EN 60529 (if a cable clamp with IP67/IP69 rating is used)
- Temperature range:** -40 °C / +125 °C
- Electrical data:** compliant with EN 61984: **40A 400/690V 6kV 3**
- Self extinguishing properties:** 94V-0 compliant with UL 94 standard glow-wire 960 °C compliant with IEC/EN 60695-2-11 standard

Designation of contacts

The designation of contacts for motor controller outlet is as follows:

contact	designation
1	line L1
2	line L2
3	line L3
4	neutral
PE	protective earth
11	aux
12	aux

The connector inserts on the power bus for a motor controller are as follows:

	screw type	spring type
	with cover	dual terminal for pole
- plug	CNEM 10 T	CSSM 10
- socket	CNEF 10 T	CSSF 10

To be installed in the enclosures illustrated in this catalogue or equivalent, with single lever (directed towards the motor).

The enclosures once complete and fitted with suitably rated cable gland or conduit fitting ensure the versatile **IP65/IP67** degree of protection according to IEC/EN 60529. With these accessories the enclosures also achieve the **IP69** degree of protection (tightness to high pressure and temperature water jets) according to the same standard. The full versatile degree of protection becomes therefore **IP65/IP67/IP69**. The **IPX9** test is identical with that of former German standard DIN 40050-9 (IP69K) currently specified by **ISO 20653** for use on board road vehicles.

¹⁾ for POF fibre preparation, the polishing kit Agilent HFBR-4593 (CXL POL) is available on request

²⁾ for HCS® (Hard Clad Silica - SpecTran Corporation registered™) connection preparation, the Crimp & Clear cabling kit (without glue or polishing kit) for simplex connectors for 200/300 µm HCS® fibre optics is available on request.

- The (CXL KCC) kit consists of:
- No. 1 scissors for kevlar cutting
 - No. 1 cable stripper
 - No. 1 fibre stripper
 - No. 1 calibrated pliers
 - No. 1 precision fibre optics cutter with diamond blade.
 - All accessories are stored in a hard carrying case

³⁾ see data on page 245

- characteristics according to EN 61984:

10A 25V 0,8kV 3

- certified

- rated voltage according to UL/CSA: 600V

- insulation resistance: ≥ 10 GΩ

- temperature range: from -40 °C to +70 °C

- contact resistance: ≤ 3 mΩ

- inserts already supplied with stainless steel fixing screw with gasket, which ensures IP66/IP67/IP69 degree of protection

- **it is recommended to crimp the contacts with crimping tools homologated by ILME** (please see the crimping tool section 10A contacts, CDF and CDM series on pages 708 - 741)

CXL 2/4 PM and PMH

CXL 2/4 PF and PFH

- 8 mm wire stripping
- POF 7 mm fibre stripping

CDF and CDM

⁺ for basic or high thickness gold plating, please refer to page 674

CDF and CDM contacts
